

Important information about our relationship with Viacom

We're on your side.

Vyve Broadband may be required by Viacom to remove all Viacom channels until a new agreement is secured. The existing agreement with Viacom, owner of numerous networks, including MTV, Nickelodeon and Comedy Central, expired on March 31, 2014, and despite good-faith efforts to negotiate a contract renewal at a fair price for these networks, Viacom continues to demand a huge rate increase. While we hope to maintain carriage of these networks, we also want to protect our customers from significant programming fee increases. Programming fees account for the bulk of your monthly bill.

OPTIONS TO WATCH VIACOM PROGRAMS

If Viacom should choose to pull its networks from service, you can watch most Viacom programs through online sources, such as Hulu Plus, Amazon, iTunes and Netflix. Some shows are free; others range from \$1.99 to \$2.99 per episode or up to \$7.99 per month, depending on the show. Certain sites may require higher Internet speeds— with Vyve Broadband service, you already have all the speed you need!
